

Educational Centre , Xoxocotla-Mexico

Dear well-wisher, benefactor, supporter, confrere,

In the year 2022, SOFIA, like many other organizations, really felt the impact of the global pandemic. Nevertheless, we continued to engage for those with less opportunities and for those, living in poverty and bad conditions. A big step was taken in creating the "Global Network of Salvatorian Schools". This initiative strives to construct ten new schools in diverse countries in the coming years. Several of those are already under construction, for others fundraising is ongoing. The Salvatorians want to contribute to create not only more pupil places, which are greatly lacking in many areas where we are active. We also want to offer quality education, especially in places where education for many children remains a dream and a wish. Furthermore, we continue our activities in the fields of sustainability, green electricity and clean water, health, human rights and capacity building. It is obvious that in our fundraising in Europe, the crisis of the war in Ukraine sparked also our emergency help. We take this opportunity to thank you for your interest and your help. We trust that you will engage with us also in future.

Fr. Piet Cuijpers, SDS & SOFIA Team

# Human Rights

The One Stop Help Centre was constructed at the grounds of Jordan University College. It unites the diverse capacities of the College and offers psychological, medical and juridical assistance to abused children and if needed their parents and families. In 2022 it assisted 100 children. Moreover, the Centre is active in prevention with workshops in 67 local schools (130 teachers and 4600 peer educators – reach: 40.000 children). Nearly 600 students, future teachers and lawyers, participated in workshops on the theme of abuse. The Centre also engages in awareness building and puts the topic of safeguarding in public attention in Morogoro town.
